PROFESSIONAL EXPERIENCE

Application Developer

Eviden
December 2023 - Present

Currently working remotely as an Application Developer for the company Eviden in Faro.

Advanced Control and Systems

Repsol Polímeros, S.A.
October 2022 - January 2023

Internship to finish the Degree in Computer Science in which I was involved on ongoing projects in the area of Advanced Control & Systems at the level of the Control Network and Industrial Safety of the Petrochemical Complex of Sines. Loops and control sequences were also implemented through Control Builder's programming software and presence in cybersecurity projects.

Network and Computer Systems Technician

Empresa Municipal de Água e Saneamento E.M
March 2019 - June 2019

Internship as part of the Associate Degree in Networks and Computer Systems, at Empresa Municipal de Água e Saneamento E.M (EMAS) in Beja, Portugal, in which helped me learn more in terms of programming, routers and servers configuration, networks and hardware.
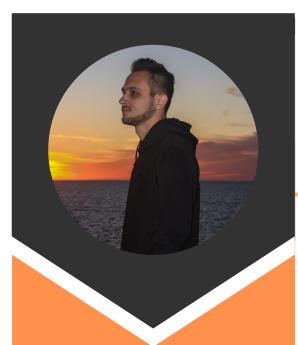

Web development

Insidewash
April 2017 - October 2017

Development of a simple website while I was still learning more about web development and didn't have much experience. The website was for a laundry company (Insidewash) in Alentejo, where during the development of the website all the information was about the business was gathered for more knowledge regarding the business to be obtained and finally the implementation of the website using html, css and javascript.
